

1.Update the receiver firmware into the latest version 191216

The screenshot shows the 'System Information' page of the K5plus+2018 receiver's web interface. The left sidebar lists various configuration options. The right panel displays system details, including the Model (K5plus+2018), Serial Number (AG1199133325865), and Hardware Version (CG1A500001). The 'Firmware Version' field is explicitly highlighted with a red box, showing the value 1.09.191216.RG11GL.

2.Input X-Fill registration code in WEB UI-Configuration-General Config-OEMRegisterCode

The screenshot shows the 'General Config' page of the receiver's web interface. The left sidebar includes 'General Config' under the 'Configuration' section. The main panel shows registration details: Serial Number (AG1199133325865), Code (EFB27E9F77C40CD87FA57B43E0E6BC8217), and ExpireDate (20200710). The 'OEMRegisterCode' field is highlighted with a red box, containing the value JweNfcNh3S8rlnGJNw5ETr02jVO.

3.Enable X-Fill function and RTX satellites
